

2023 VIZIENT CONNECTIONS SUMMIT

**TOGETHER**  
*we will soar*

SEPT. 18–21, 2023  
WYNN, LAS VEGAS

vizient®

# Learning Objectives

- Explain successful strategies to facilitate improved documentation by targeting specific diagnosis opportunities at the service line level.
- Describe a multidisciplinary approach to track, trend and enumerate the value of CDI, coding and quality partners in the PSI-90 exclusion process within a complex, multihospital health system.
- Explain steps in identifying hospital-acquired conditions (HAC) and perioperative complications.

*we will soar*

vizient

# Leveraging the CDB to Improve Quality & Accountability metrics

*Tracy Ferro MSN, RN, CCDS, Corporate CDI Program Director in System Quality at the Medical University of South Carolina (MUSC) Health System*

*Aubrie Booth MSN, RN, CCDS, CCM, CDI Manager, Charleston Division at the Medical University of South Carolina (MUSC) Health System*

*we will soar*

vizient.

# Disclosure of Financial Relationships

Vizient, Inc., Jointly Accredited for Interprofessional Continuing Education, defines companies to be ineligible as those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.

An individual is considered to have a relevant financial relationship if the educational content an individual can control is related to the business lines or products of the ineligible company.

No one in a position to control the content of this educational activity has relevant financial relationships with ineligible companies.

*we will soar*

# The Why

- MUSC Health expansion created opportunities for systemization and alignment
- Systemwide opportunity exists for improvement in LOS index; both the O and the E
- Service lines requesting service specific documentation improvement opportunities (to aid improvement of the E)

*we will soar*

vizient.

# Systemization and alignment

## July 2022 → CDI department systemized

- Systemized under Corporate CDI Program Director (under System Quality)
- Increased staff ~ 1,200 discharges per FTE (goal ~100% CDI coverage (excluding psych, rehab, mother/baby/NICU))
- Acquired Performance Data Monitoring Reporting

*we will soar*

vizient.

# CDI Systemization

- Systemized under Corporate CDI Program Director (under System Quality)
- Increased staff ~ 1,200 discharges per FTE (goal ~100% CDI coverage (excluding psych, rehab, mother/baby/NICU))

# LOS index improvement opportunity

## Pros:

- Targets increasing expected LOS
- Derived from most frequently seen risk variable diagnoses across multiple risk models including the Vizient “Big 3”: AKI, F&E, malnutrition
- For use MUSC systemwide

## Cons

- Generally applicable/lacks individuality
- Use of SmartPhrase not currently measurable

System SmartPhrase – PRESENTONADMISSION [369288]  
(Ctrl+Shift+3)

Do not include PHI or patient-specific data in SmartPhrases.

Insert SmartText   Insert SmartList

# Step by step:

- Select appropriate Risk Model (year/AMC or Community)
- Patient Outcomes
- Choose time frame desired (quarter/year)
- Select Focus hospital
- Select appropriate compare group using hospital profiler (select “show grouped”)

The screenshot displays the 'Report Builder' interface with the following configuration:

- Home** | **Report Builder** | Report Express | Physician Insight | Saved Report | Scheduled Report | Report Templates
- Risk Adjustment Model:**  2022 Risk Model (AMC) |  2021 Risk Model (AMC) |  2022 Risk Model (Community) |  2021 Risk Model (Community)
- AHRQ Version:**  V2022 |  V2021 |  V2020
- Report Patient Type:**  Inpatient |  Non-Inpatient |  Both
- I want to look at:**
  - Patient Outcomes:** [Dropdown menu]
  - By:** [Hospital / Hospital System]
  - Use Custom List(s)
  - Show Total and Subtotal Lines
  - Multiple Group By** (text)
- Focus hospital:** [420004 MUSC]
- Comparison hospitals:**
  - For the following comparison hospitals**  show grouped
    - None
    - All available hospitals in the database
    - All available CRM hospitals
    - All available hospitals with lab data
    - My state
    - Group A hospitals
    - Group B hospitals
    - My custom list
  - You can select both a Hospital System List and a Custom List by holding the Control key and multi-selecting.**
  - Hospital System List Name:** [List of systems including ADVENTHEALTH\_SYSTEM, AHMC\_SYSTEM, ALAMEDA\_SYSTEM, ALLEGHENY\_SYSTEM, ALLINA\_SYSTEM, ARIZONA\_SYSTEM, ASCENSION\_SYSTEM]
  - Select a Custom List:** [My Selected Custom List]
  - Custom List:** [List of hospitals including 008000 AH\_CELEBRATION, 008100 AH\_KISSIMMEE, 008200 AH\_EORLANDO, 008300 AH\_APOPKA, 008400 AH\_ALTAMONTESPRINGS, 008500 TPC\_HENDRICK\_SOUTH, 009901 AH\_WINTERPARK, 009902 JACKSONSOUTH, 009903 JACKSONNORTH, 009904 JACKSON\_HOLTZCHILDRENS, 009905 JACKSONWEST, 009908 LEHIGH\_HECKTOWNOAKS, 009910 SHARP\_MARYBIRCH, 009911 SHARP\_MCDONALD, 010024 JACKSONHOSPITAL, 010033 ALABAMA, 010046 PRIMEHEALTH\_RIVERVIEW, 010087 LISD]
  - Save the above selections as a custom list** (text)
  - Help me decide using hospital PROFILER** (text)

*we will soar*

vizient

# Step by step:

- Add restriction for Service line/Sub-service line or DRGs for your area of focus
- Run report to attain *total* number of cases:
  - *your focus hospital*
  - *cohort group*

## Example:

<u>Q1, 2023</u>	<u>Total Cases</u>
MUSC- Neurology	530
Vizient Q&A 2022 CAMC	46,153

**Standard restrictions**

LOS Outlier  Include All  Include Only  Exclude All

Early Death  Include All  Include Only  Exclude All

Clinical Category  Include All  Include Only  Exclude All

Diagnosis / Procedure  Include All  Include Only  Exclude All

Complications / Risk Adjustment  Include All  Include Only  Exclude All

AHRQ Indicators  Include All  Include Only  Exclude All

NHSN Events  Include All  Include Only  Exclude All

Physician  Include All  Include Only  Exclude All

LOS, Total Cost, Total Charges  Include All  Include Only  Exclude All

Demographics  Include All  Include Only  Exclude All

Payer  Include All  Include Only  Exclude All

Clinical Resources  Include All  Include Only  Exclude All

Service / Service Group  Include All  Include Only  Exclude All

Patient Identifiers  Include All  Include Only  Exclude All

Admission / Discharge  Include All  Include Only  Exclude All

Core Measures  Include All  Include Only  Exclude All

**Add Restrictions**

Source: Vizient CDB

*we will soar*

vizient

# Step by step:

- Add restriction: Any diagnosis/diagnoses in the desired risk variable category
- Run report to attain *total* number of cases with diagnosis capture:
  - *your focus hospital*
  - *cohort group*

Advanced restrictions

Add Restrictions

Complex expressions can be built for both non RM (resource manager) and RM related restrictions. The valid operators are "AND, OR and &". For more information please refer to the [FAQ Building Expression document](#).

Build Expression

INCLUDE IN REPORT	RESTRICTIONS	JOIN	EDIT	DELETE
<input checked="" type="checkbox"/>	Vizient Service Line (Neurology)	AND		
<input checked="" type="checkbox"/>	Any Diagnosis ICD-10(E43, E44, E440, E441, E46) with POA (Y)	AND		

## Example:

	total	malnutrition diagnoses	% capture
Q1, 2023			
MUSC- Neurology	530	44	8.30%
Vizient CAMC	46,153	3,883	8.41%

# PSI-90 Exclusion Systemization

## The Why

- Opportunity to increase the accuracy of our internal and external data and outcomes related to PSI – 90 and to reduce penalties incurred
- Lacked systemized process for PSI-90 exclusion tracking and trending
- Lacked process to enumerate CDI value in PSI-90 exclusion work
- No process by which to verify excluded PSIs were truly excluded

*we will soar*

vizient.

# PSI-90 Exclusion Systemization Project Goals

- Created SmartSheet for all PSI exclusion data entry & reporting capability
- Stood up monthly PSI-90 workgroup to standardize PSI exclusion work across the system

*we will soar*

# PSI-90 Exclusion Systemization Smartsheet

1. **Quality control** → Use Smartsheet data to compare excluded PSI-90 against internal dashboard (Vizient derived data )
2. **Track/trend** → Use Smartsheet reports to collate CDI/Quality exclusions by service line, provider, date, type of exclusion.
3. **Enumerate value** → Use Vizient derived PSI penalty \$ amount to allocate financial value to CDI exclusion work

vizient

# Lessons Learned

- Deep dive workbooks are manual and time intensive ; currently cannot be scheduled
- Save each report individually
- Many risk variable (diagnosis) opportunities between service lines are similar
- Add spot for “none applicable” to smart phrase to broaden usage
- For PSI-90 exclusion tracking, verify all fields necessary to incorporate into tracking system. (We added ‘nursing unit’ about 1 year after inception → in hindsight we should have added at beginning)

*we will soar*

vizient.

# Key Takeaways

- You can't fix everything at once; focus on priorities of customer base.
- Harness any engagement by customer base. Documentation education and training opportunities often intersect with other projects.
- Enumerate your value!!

# Disclosure of Financial Relationships

Vizient, Inc., Jointly Accredited for Interprofessional Continuing Education, defines companies to be ineligible as those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.

An individual is considered to have a relevant financial relationship if the educational content an individual can control is related to the business lines or products of the ineligible company.

No one in a position to control the content of this educational activity has relevant financial relationships with ineligible companies.

# WE ACT

## UHD Performance Improvement Methodology

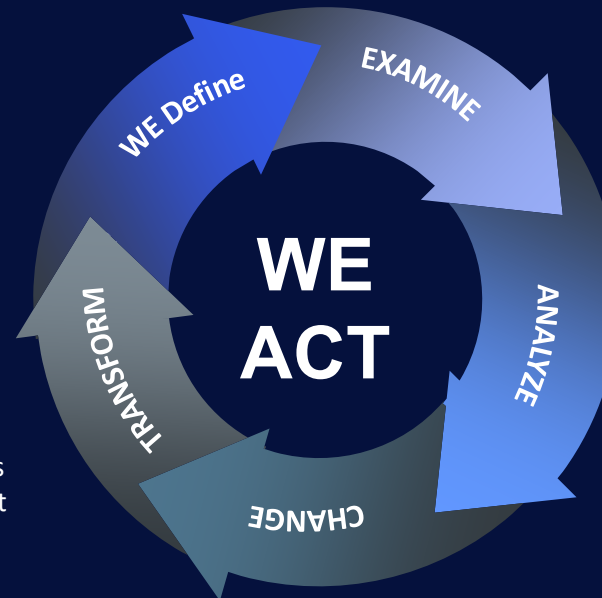

### WE Define

- Define the Problem
- Set Goal & Targets
- Identify team members
- Business Case
- Scope of the project
- Current State/Process Map

### TRANSFORM

- Implement improvements and changes
- Develop a plan to sustain improvement
- Collect data to sustain improvements over time

### EXAMINE

- Develop a data collection plan
- Collect Data

### ANALYZE

- What is the data telling you?
- Identify ROOT CAUSES

### CHANGE

- Develop Improvement Plan to address ROOT CAUSES
- Make necessary changes
- Future State/Process Map

# Patient Safety Indicator 90 (PSI 90)

PSI 90 combines the smoothed indirectly standardized morbidity ratios (observed/expected ratios) from selected AHRQ PSIs, including some Hospital Acquired Conditions and Peri-operative complications

INDICATOR	HARM WEIGHT	VOLUME WEIGHT	COMPONENT WEIGHT
PSI 3 Pressure Ulcer Rate	0.3080	0.1048	0.1641
PSI 6 Iatrogenic Pneumothorax Rate	0.1381	0.0457	0.0321
PSI 8 In Hospital Fall With Hip Fracture Rate	0.1440	0.0194	0.0142
PSI 9 Postoperative Hemorrhage or Hematoma Rate	0.0570	0.1526	0.0442
PSI 10 Postoperative Acute Kidney Injury Requiring Dialysis Rate	0.3584	0.0310	0.0564
PSI 11 Postoperative Respiratory Failure Rate	0.2219	0.2125	0.2397
PSI 12 Perioperative Pulmonary Embolism or Deep Vein Thrombosis Rate	0.1557	0.2318	0.1835
PSI 13 Postoperative Sepsis Rate	0.3102	0.1384	0.2182
PSI 14 Postoperative Wound Dehiscence Rate	0.1441	0.0170	0.0125
PSI 15 Abdominopelvic Accidental Puncture or Laceration Rate	0.1474	0.0468	0.0351

# Examples of Interventions

- Documentation and coding of pressure injuries as POA when patient presented with pressure injuries was an exclusion criteria for PSI-03
- Documentation and coding of anticoagulation was an exclusion criteria of PSI-09
- Documentation and coding of infection POA was an exclusion criteria of PSI-13
- PE was in the differential diagnosis but was never confirmed by imaging or any other test (PSI-12)
- Appropriately coding lung biopsy as part of a procedure was an exclusion criteria for PSI-06
- Documentation and coding for Pleural Effusion is an exclusion criteria for PSI-06
- Documentation and coding of chronic Pulmonary Embolism is not part of the inclusion criteria for PSI-12

*we will soar*

vizient

# Lessons Learned

- Involving all the players from the start
- Having CDI team focus on quality as they focus on revenue cycle when they review documentation and coding
- Having CDI training for members of the PI team

*we will soar*

vizient.

# Key Takeaways

- PSI 90 is a major patient safety indicator
  - Publicly reported metric
  - Financial attachment
- Ensuring appropriate documentation and coding is a critical step to reduce PSI 90
  - Improve quality of care
  - Reduce HACs and perioperative complications
- Following similar process to improve Mortality Index by improving Expected Mortality

*we will soar*

vizient.
