# Improving Mortality and Sepsis Care: Novel Approaches to EHR Optimization

**Jason A. Porter, MD, MBA, FACEP**, Chief Medical Officer, AdventHealth Altamonte Springs

**Shreya Sunny, BSIE, CLSSBB**, Process Improvement Specialist III, AdventHealth

**Allison Mott, BSN, RN, WOC, PCCN**, Regional Senior Nurse Manager Clinical Outcomes & Operations, AdventHealth

**Purnema Madahar, MD, MS**, Associate Director of MICU & Medical Critical Care Services, Columbia University Medical Center/New York Presbyterian Hospital

**Joseph A. Mailman, MD**, Assistant Professor of Clinical Medicine, Weill Cornell Medical College/New York Presbyterian Hospital

**Sweta Patel, MHS, PA-C**, Physician Assistant, New York Presbyterian Hospital

REFLECTION

# Disclosure of Financial Relationships

Vizient, Inc., Jointly Accredited for Interprofessional Continuing Education, defines companies to be ineligible as those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.

An individual is considered to have a relevant financial relationship if the educational content an individual can control is related to the business lines or products of the ineligible company.

Joseph A. Mailman, MD, speaker for this educational activity, is a consultant for Masimo.

All relevant financial relationships listed for this individual has been mitigated.

All others in a position to control content for this educational activity have no relevant financial relationship(s) to disclose with ineligible companies.

REFLECTION

# Learning Objectives

- Discuss the methods employed to drive significant impacts on quality and patient outcomes, including improvements in sepsis best practice alerts.
- Identify the steps to create a user-friendly, automated EHR-tool that is incorporated into hospital notes to improve documentation practices, as well as how variables are selected and updated.

## AH Corporation

- 22** Home health and hospice agencies
- 56** Urgent care facilities
- 52** Hospital campuses in **NINE** states
- 1973** Year AdventHealth network was established
- 95,000+** Team Members
- 8 MILLION+** Patient Interactions annually

## Central Florida

- 8** Hospitals
- 165,000** Inpatient Visits
- 510,264** Outpatient ED Registrations
- 3,260** Beds

## Enterprise Principles

## Recognitions

- LEAPFROG HOSPITAL SAFETY GRADE A** (Spring 2024)
- THE LEAPFROG TOP HOSPITAL 2022**
- THE LEAPFROG TOP HOSPITAL 2021**
- THE EMERALD AWARD**
- MAGNET RECOGNIZED** (American Nurses Credentialing Center)
- BEST HOSPITALS** (USNews) - **NATIONALLY RANKED** in 4 Adult Specialties, in 1 Children's Specialty
- BEST REGIONAL HOSPITALS** (USNews) - **REGIONALLY RANKED** #2 in Florida, Recognized in Central Florida, #1 in Orlando
- HIGH PERFORMING** (USNews) - in 6 Adult Specialties, in 15 Procedures/Conditions

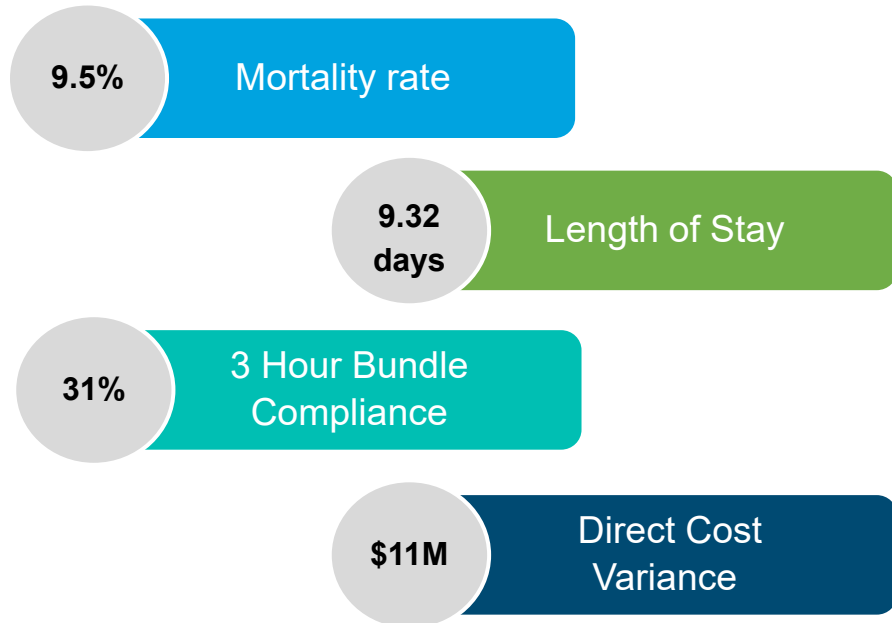

REFLECTION

# Overview

## Problem

Sepsis is challenging to identify due to its varied and nonspecific presentation. The complexity hinders timely diagnosis, complicates treatment protocols, and disrupts care coordination. This leads to an increase in LOS, mortality, and cost of care.

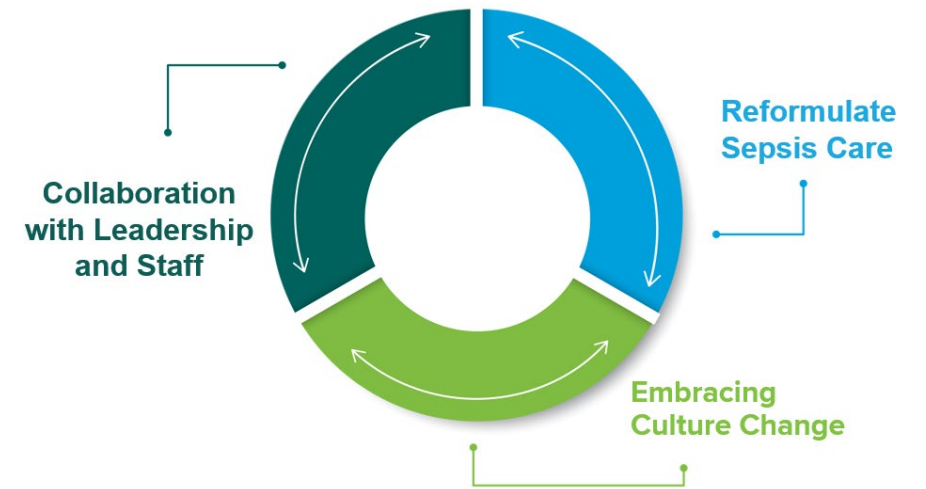

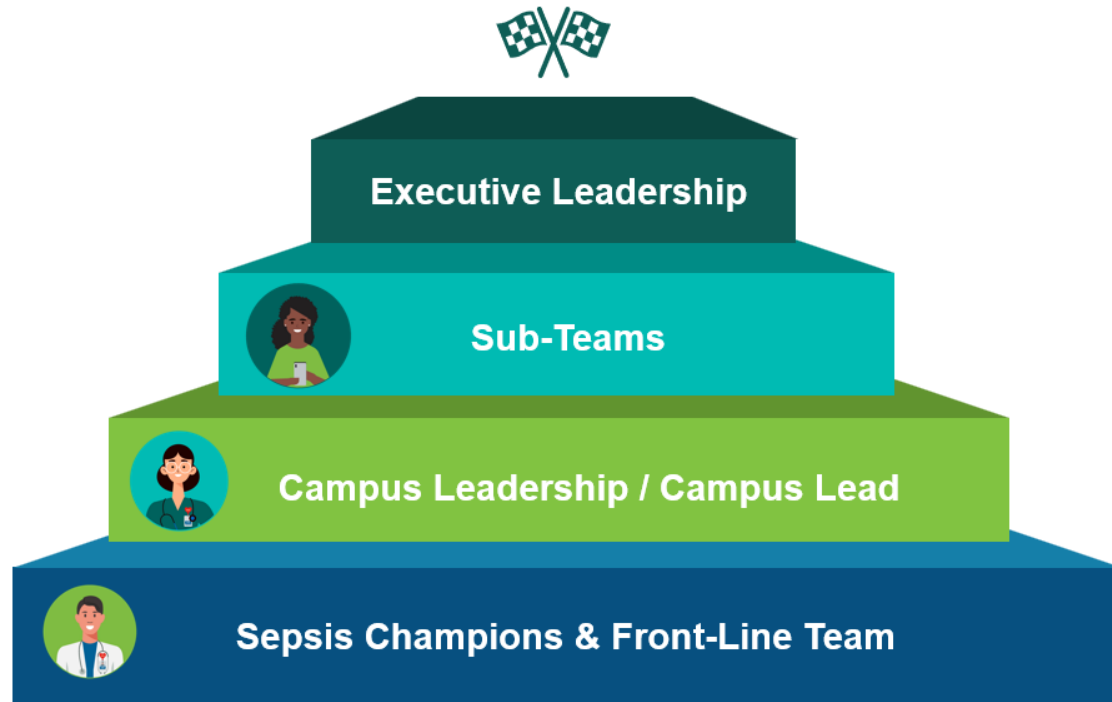

For AH CFD, the following were the **baseline average figures** from August 2022 - May 2023:

## Mission Actions

- 1 OPTIMIZED SEPSIS DEFINITION, DIAGNOSIS, AND RESPONSE**
- 2 ENHANCED TREATMENT, CARE COORDINATION, AND TRANSITIONS**
- 3 IMPROVED EDUCATION, DOCUMENTATION, AND MEASUREMENT**

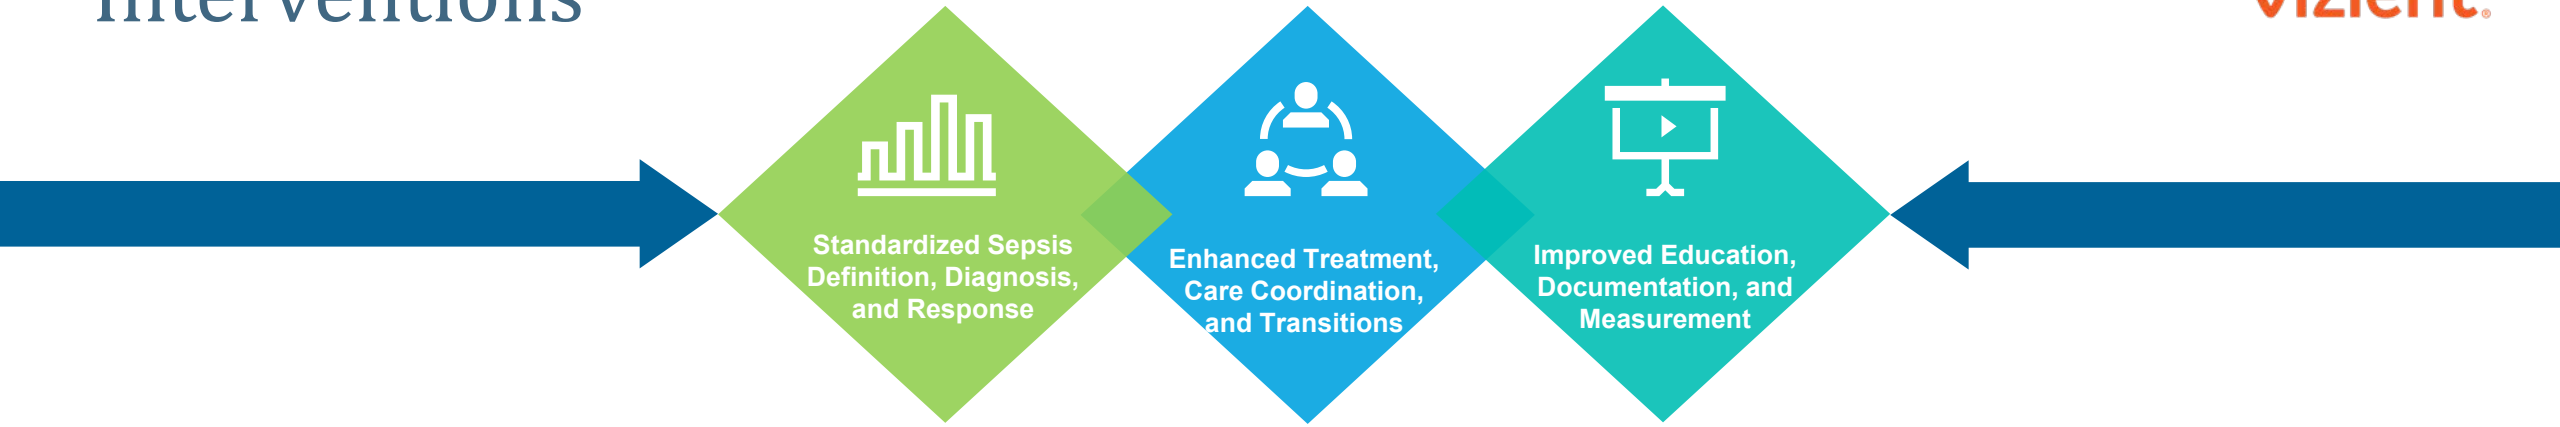

# The Vision to Success

REFLECTION

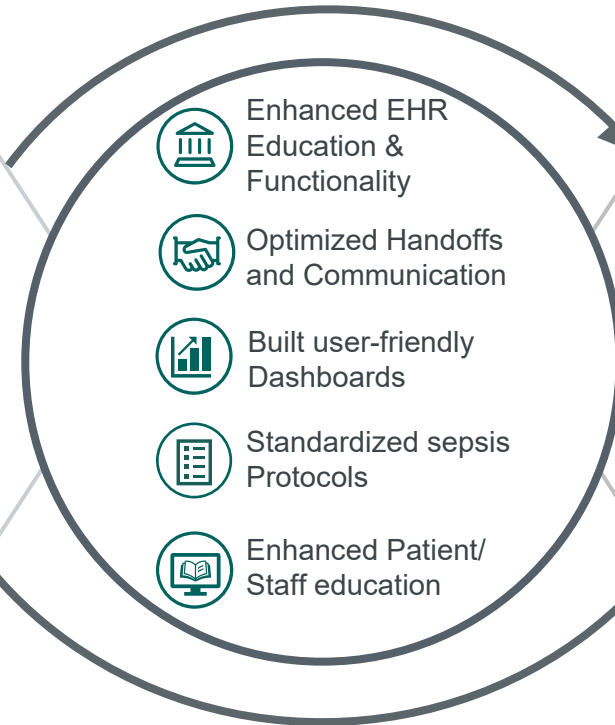

# Interventions

## Key Project Deliverables

- Alert Configuration
- Enhanced Order sets
- “Advent Stance” Sepsis Definition
- Interdepartmental Notification and Response
- Care Team Roles & Responsibilities
- Hand-Offs and Transitions
- ‘Sepsis Booklet’ for patients
- Sepsis Public Awareness
- Nursing and Provider Education

## Impact

- Increased Outcome Performance
- Enhanced Care Team Efficiency
- Improved Patient Experience

REFLECTION

# Implementation Results: Improved Process Measures

## 3 Hour Bundle Compliance, Order set Utilization by Discharge Month

● Patient Volume ● 3Hr Bundle Met ● Order Set Met

Data Source: CLINICAL | Sepsis Dashboard | AH - Clinical Review - Power BI | CFDS sepsis discharges | CFD | Sepsis Outcomes Tracking - Power BI | Corporate Case Management Dashboard | Vizient | January 2023 – May 2024 | MS-DRG: 870-872

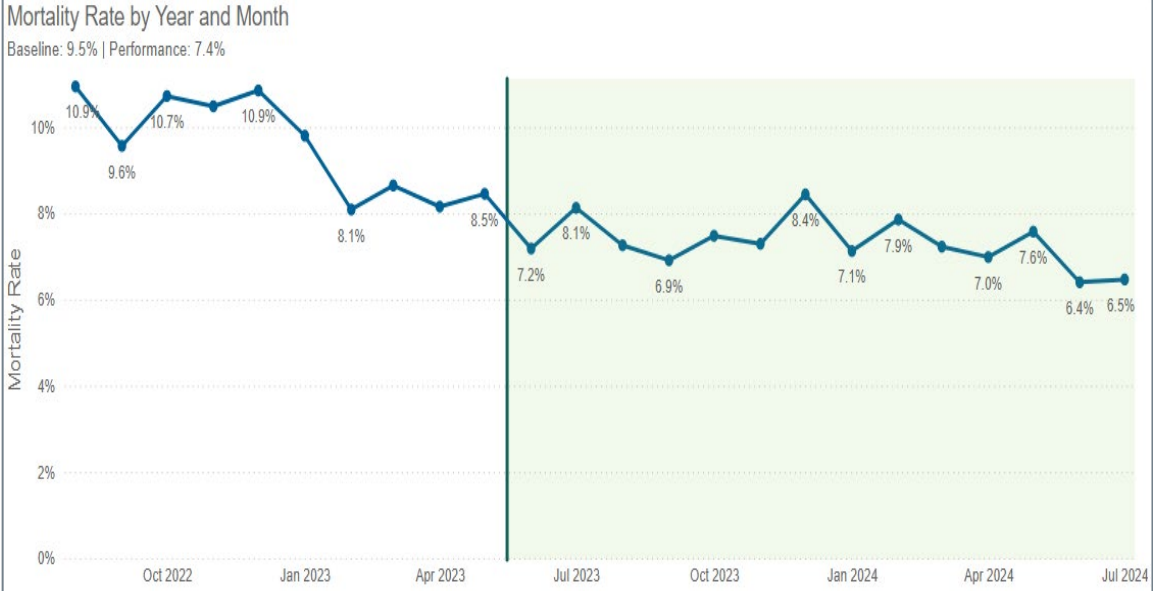

# Implementation Results: Cost Avoidance

## Sepsis Outcomes Tracking

Baseline Period from August 2022 to May 2023 | Performance Period from June 2023 to June 2024 | Population = Any Sepsis Diagnosis

Campus	Discharges (Baseline)	Discharges (Performance)	Days Avoided	Cost Avoided
Altamonte Springs	2398	3825	6693	\$5.48M
Apopka	1014	1495	2167	\$1.91M
Celebration	2201	3270	2465	\$2.41M
East Orlando	2531	4003	4053	\$3.69M
For Children	545	1440	3802	\$3.63M

<b>Total</b>	<b>17825</b>	<b>27747</b>	<b>37049</b>	<b>\$33.41M</b>

REFLECTION

# Lessons Learned

EHR Optimization Alone is Insufficient

Operational Leadership is Essential

Adoption Requires Time

Continuous Learning Process

Emphasizing Change Management

REFLECTION

# Key Takeaways

## Optimize

Tracking, compliance, performance tools and processes

Make understanding and achieving process and outcome measures easy.

## Ignite

Harness the power of team recognition and competition

Keep it fun with recognition, awards and gamification.

## Teamwork

Cross functional collaboration

Ensure all stakeholders are at the table and ready to engage.

## Oversight

C-Suite accountability & sustained efforts for performance

Organizational clarity on performance expectations is key.

## Running the Marathon

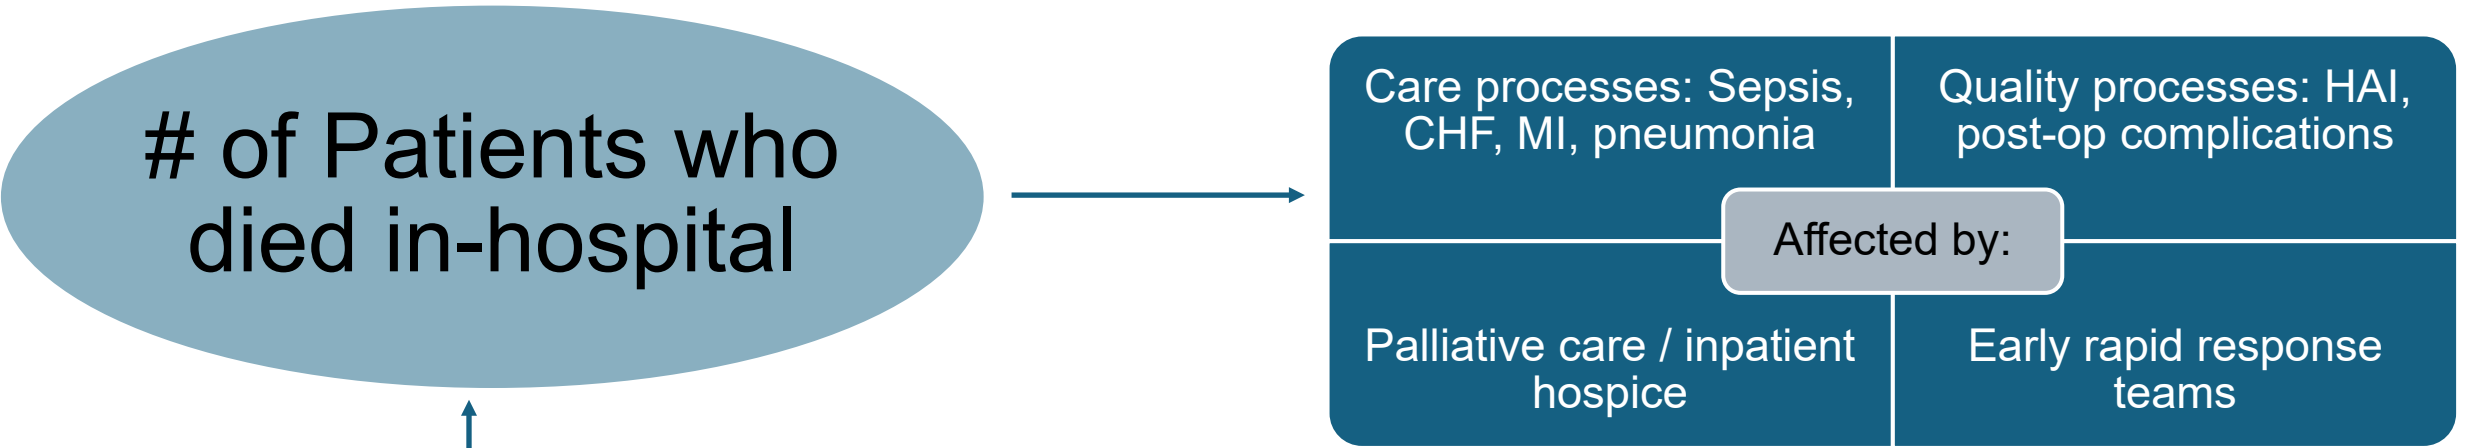

“Achieving success isn’t a sprint; it is a sustained effort that require constant training and enthusiasm.”

# Improvement in Expected Mortality and Mortality Index After Implementation of the Automated EHR Tool

— 2022      — 2023      — 2024

Source: CDB (Jan 2023 – May 2024); Age ≥ 18; AMC Risk Model. NYPH excludes Queens, Hudson Valley. AMC Compare consists of Vizient Top Q&A Ranked Hospital, based on 2023 Q&A Rankings.

# Lessons Learned

- Selection of key variables is important
  - Impactful
  - Objective: amenable to rule-based criteria in the EHR
- Data driven implementation and iteration has led to a highly successful outcome and ongoing progress.

# Key Takeaways

- Accurate documentation is important to reflect the high acuity of hospital patients and a precise expected mortality.
- Utilization of an automated EHR tool can improve diagnosis capture rates for key risk variables that contribute to important hospital metrics.
- Frequent iterations based on data-driven metrics and a robust CDI division can help improve diagnosis capture rates.
